Experience

IDX Solana

New Delhi, India

Full Stack Developer

Apr 2025 – Present

- Architected and shipped **IDX Wallet**, a production Chrome Extension and mobile wallet using React, TypeScript, React Native, and Solana Web3.js, supporting wallet creation, SPL token management, token swaps, fiat onboarding, and staking across web, iOS, and Android.
- Built backend microservices integrating **Solana RPCs, Redis caching, and BullMQ** for asynchronous transaction processing and real-time blockchain data handling, optimizing RPC call patterns and on-chain query latency.
- Developed Solana dApps and admin portals with **JWT authentication, API validation, rate limiting, and security middleware**; deployed production services on AWS EC2 using Docker, GitHub Actions CI/CD, and Nginx.
- Designed real-time transaction workflows using **WebSockets and asynchronous job processing**, enabling reliable blockchain state updates across wallet and platform services.

Ametheus Holdings Pvt. Ltd.

New Delhi, India

MERN Stack Developer

Jan 2024 – May 2025

- Developed production healthcare and real-estate applications using **React.js, Node.js, Express.js, and MongoDB**, integrating payment gateways and REST APIs across multiple client-facing platforms.
- Improved backend performance using **Redis caching, MongoDB indexing, and query optimization**; introduced BullMQ workers for scheduled reports and notification workflows, removing blocking operations from API requests.
- Optimized frontend performance through **lazy loading, code splitting, responsive design, and SEO improvements**, including structured data markup.
- Contributed to production support, debugging, code reviews, and cross-functional delivery across multiple client applications.

Molecule

Gurugram, India

Frontend Developer Intern

Aug 2023 – Nov 2023

- Built reusable and accessible React.js components, integrated REST APIs, and improved responsive design, cross-browser compatibility, and overall user experience.

Selected Projects

IDX AutoBot

Next.js, Node.js, TypeScript, Solana Web3.js, Redis, PostgreSQL

- Built a production Solana trading platform with a Next.js admin dashboard and multi-engine trading workflows across **Pump.fun, Raydium, Orca, and Meteora**.
- Designed asynchronous trade execution and transaction monitoring using **BullMQ, Redis, and WebSockets**, enabling real-time transaction status and queue management.

Ametheus Health

React.js, Node.js, Express.js, MongoDB, Redis, BullMQ

- Developed an end-to-end pharmaceutical e-commerce platform with authentication, order processing, payment integration, Redis caching, and asynchronous notification workflows.
